23rd May 2024

To Whom It May Concern,

I am writing to offer my wholehearted recommendation for Phoon Thet Pine in his application to your esteemed program in Computer Science, Software Engineering, or Computer Engineering. As the Campus Manager at Futurum Academy at United Square, where we specialise in teaching coding and robotics to children aged 4 to 18, I have had the pleasure of working closely with Thet and witnessing his exceptional skills and dedication firsthand.

Thet Pine has been an invaluable asset to our team, demonstrating remarkable talent and passion for the fields of coding and robotics. His expertise spans various disciplines, including Vex Robotics, Python and Scratch programming, as well as 3D design using AutoCAD and Fusion 360. His ability to master these diverse and complex subjects is a testament to his intellectual curiosity and commitment to continuous learning.

One of Thet Pine's most outstanding qualities is his ability to communicate complex concepts in a way that is accessible and engaging for young learners. His patience, creativity, and teaching acumen enable him to break down intricate topics, making them easier for children to understand and enjoy. This skill is not only crucial in our educational environment but also indicative of his potential to excel in higher education and beyond.

I am confident that Thet will bring the same level of dedication, passion, and excellence to your university as he has to Futurum Academy. His unique combination of technical expertise, teaching talent, and relentless pursuit of knowledge makes him an ideal candidate for your Computer Science, Software Engineering, or Computer Engineering program. I have no doubt that he will not only thrive in your academic environment but also make significant contributions to your institution and the broader field of technology.

I wholeheartedly endorse Thet for admission to a computer science or software engineering program, confident that he will excel in his chosen field. For any inquiries or further information, please feel free to contact me at +65 8154 1560.

Sincerely,

Wang Xiang

Campus Manager
