

Letter of Recommendation for Phoon Thet Pine

Date: 12 February 2026

It is my pleasure to write this letter of recommendation for Phoon Thet Pine as he applies to pursue a degree in Computer Science or a computing-related field at university. As the Head of Curriculum at The Young Maker Pte. Ltd., I have had the privilege of working closely with Thet Pine in his capacity as a teacher at our institution, and I have witnessed his growth and development firsthand.

Thet Pine joined The Young Maker as a teacher and quickly distinguished himself through his strong technical foundation, independence, and professionalism. Over time, I have seen him grow not only in confidence but also in his ability to take ownership of both instructional and developmental responsibilities within the organisation.

One of Thet Pine's most notable strengths is his ability to work effectively with minimal guidance. In our fast-paced educational environment, teachers are often required to adapt lesson plans, troubleshoot technical issues, and respond to students' learning needs in real time. Thet Pine consistently demonstrates the ability to assess situations independently, make sound decisions, and execute solutions without the need for constant supervision. He does not wait to be directed; instead, he proactively identifies gaps—whether in lesson delivery, student understanding, or curriculum structure—and takes initiative to address them.

His initiative has been particularly evident in his contributions to curriculum development. Thet Pine has gone beyond his teaching duties to provide thoughtful recommendations that enhance the relevance and depth of our programmes. Notably, he proposed the introduction of Swift development modules for students interested in iOS application development. Recognising the growing interest among students in building mobile applications, he identified Swift as a valuable and forward-looking addition to our curriculum. His recommendation demonstrated both technical insight and an understanding of student aspirations, and it contributed meaningfully to the expansion of our course offerings.

In the classroom, Thet Pine combines technical expertise with clear communication and structured thinking. He is able to break down complex computing concepts into accessible explanations, ensuring that students grasp both the theory and practical applications. His growth as a teacher has been evident in his increasing confidence in managing classes independently, designing learning activities, and guiding students through problem-solving processes.

Thet Pine also embodies a strong work ethic and professionalism. He is reliable in meeting responsibilities, receptive to feedback, and consistently committed to improving both his teaching practice and technical knowledge. His maturity, initiative,

and ability to contribute strategically to our organisation make him a valuable member of our team.

Given his technical capability, independent mindset, and proactive contributions to curriculum innovation, I am confident that Thet Pine will excel in a Computer Science or computing-related degree. He possesses the intellectual curiosity, discipline, and initiative necessary to thrive in a rigorous academic environment and to contribute meaningfully to the university community.

I wholeheartedly recommend Phoon Thet Pine for admission and am certain that he will continue to demonstrate the same dedication, adaptability, and drive in his future academic pursuits.

Please feel free to contact me should you require any further information.
